

JD02-FD user manual

I. Safety Instruction

1. For security, please read the user manual carefully before initial operation;
2. Please be sure the power is off before connecting, the product is produced without fuse;
3. This system must not endanger life or property during the running failure or its security risks have

II. Technical Specification

1. working voltage: 12-265VAC /DC
2. Loading capacity: <3W
3. Flicker Frequency: 1HZ
4. Working temperature: -20° ~+60°C
5. IP Level: IP54

III. Connecting Instruction

1. Power input connect to PCB board terminal, Working power 12V–265V DC/AC

2 SW1 switch

It's the switch for switching LED in flickering or lighting,

When SW1 at connecting, LED will flicker after power on;

When SW1 at disconnecting, LED will light after power on
